

Submitter: Margaret Boutell

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

Include electrification in the package! Fund critical electrification programs to increase access to charging and lower barriers to decarbonization.

Fully fund Great Streets, Safe Routes to School, and Oregon Community Paths. Fully fund public transit and passenger rail service.

Investments in public transit and active transportation save money for households and the state because cars can be expensive to own and maintain for low-income and working class Oregonians.
