

Submitter: Stephanie Farnsworth

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

I am writing as a concerned Oregon citizen. Since the first of the year I have seen a sudden increase in reports of new and increasing taxes our state government is working on implementing.

Enough is enough. We work hard for the money we have, and we budget and make sure it covers everything needed. We always have and continue to live beneath our means. This type of strict budgeting is how progress happens. The state of Oregon is mismanaging our money if they still don't have enough. Our prices on fuel are already higher than most other states. Oregon is the 4th highest in the country for fuel prices.

Please do not even consider passing this bill. I don't feel like our current governor and majority leaders care at all about we the people who live and work in this beautiful state.
