Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

I use public transportation to get to work at an art studio for children. In the face of rising fascism, public transit accessibility and funding is crucial for connecting people to places, growing the economy and making life in the city possible. The transit is good and needs to sustain good; however it could also be greatly improved through sustainable energy such as electrification of busses through corporations that are NOT linked to Elon Musk.
