

Submitter: Thomas Mensing

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

Trimet is how I get to work everyday and the only way I get around. Having affordable public transit is a public good that improves our city, while expanding roads makes our cities louder, polluting, and forces us to expand our cities in ways that are unsustainable and an urban sprawl.

Additionally by having affordable transit, and not relying on a car I can have much better financial control over my life and spend more at the Portland businesses that I love.
