Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

People are fleeing this beautiful state due to the impossibly high taxes, which affects not only gas costs but all utilities and adds to the cost of food. We are spending billions on govt. projects that help no one, just a bottomless pit that shows no benefit to the hard working people trying to work and live here. The homeless are still homeless, dying daily on our streets. People are allowed to destroy the businesses of hard working people in the name of advocacy which again shows no positive results. Our state is dying from one party rule with no end in site except more taxes. Take a minute to think of the people who are paying these taxes, desperately trying to hang on month by month. Many each month can't afford their homes, food, medicine and other necessities, and still more and more taxes. You were elected to serve the people, not destroy them. It seems that all you do in Salem is spend, find ways to tax more to spend more with some getting rich and the rest struggling to live. I came here 40+ years ago and thought it was paradise, this is NOT the Oregon I came to in 1979, it is a disaster. No more increases on gas, no more new taxes. Find ways to do the job you signed up for, to serve the hard working people of Oregon.

Respectfully submitted, Randeen Cummings
