Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

As a past Civil Engineering Tech and County Commissioner I witnessed excessive waste with projects (money), it's time to make ODOT accountable rather than taxing for more money. ODOT is a poorly managed agency with very little awareness of how to stay within a budget with long term strategic issue planning. The makeup of the agency under utilizes the field personal and has an excessive amount personal in Salem (it's called top heavy management). Also ODOT could be using standard design for a number of projects. Throwing more money at a poorly managed system doesn't solve our problems.
