Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

This bill continues to make it more expensive to live in Oregon. I am several months away from being ninety years old, living independently, with a modest income for now, but unable to afford moving out of state as is, and has been, several of my children and their families. The latest will be taking herself, husband, and three grand and great grandchildren with them to South Carolina. One of her passing remarks was, " ... so ready to "shake the dust" from my feet of living in Oregon". With Democratic control of Oregon being pretty much solidified, there is little hope of change; and I would join them if my body and finances would allow. Please reconsider what you are doing to most of the residents of this once beautiful state.
