

Submitter: Renee Bartley

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

Please include \$5 million in this package for the City to do the design work needed to acquire federal funds that will help build an emergency evacuation route bridge for residents of St. Johns. Without this funding, we will be cut off from resources and emergency services and will have no way of evacuating should an earthquake happen. Not only is this life threatening but the fact that we live within a mile of the CEI Hub provides additional, serious dangers. Please provide this funding so the people of St Johns have bridge that will withstand the quake and provide a reliable emergency evacuation route.
