Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

Honorable Committee Members - As a taxpaying citizen of Oregon, I am strongly opposed to HB 2025. This is a costly and unnecessary new tax proposal on citizens who can least afford a tax increase. With ever rising utility costs along with yearly property tax increases in Oregon and ongoing inflation in food and housing here your citizens are at the breaking point. This state already has some of the highest fuel taxes and transit taxes and this boondoggle of a bill will heap more misery on the very people you're elected to help, NOT hurt. Please dump this bill into the rubbish bin where it belongs, and do not put it upon your over burdened, over taxed citizens
