

Submitter: Angela Clarkson
On Behalf Of: Residents of St. Johns
Committee: Joint Committee On Transportation Reinvestment
Measure, Appointment or Topic: HB2025

I live in the St. Johns of North Portland and we need funding to repair our bridges so they don't collapse during an earthquake. If there's an earthquake the residents of St. Johns will be stuck...no way in or out, unless our bridges over the railroad tracks are reinforced. Please do the right thing and vote to fund the bridge repairs necessary to keep our residents safer and prevent a bad situation from being tragic and saving lives. The citizens of St. Johns are counting on this funding for a safer and more secure future, for not IF a quake happens, but WHEN it happens. Thank you for voting for our St. Johns bridge repair funding!
