

Submitter: Harriet Shaklee Shaklee

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

As informed participants in Oregon's political landscape you're no doubt aware of the importance Oregonians place on having a quality environment. Limiting climate change is a key strategy for preserving quality of life of our children and their children. For this reason I urge you to support HB2025 with its assistance for low and moderate income families making the transition to an electric vehicle, the support for the addition of public charging stations to make EV a viable option even in less populated areas, and the incentives for commercial trucking to invest in EV trucks. Unfortunately we're losing support for these key transitions at the federal level. All the more important to pass the transportation package that represents Oregon's values.

Thanks for your good work for Oregon's residents and their environment.
