

Submitter: Brad Loseke
On Behalf Of: Myself and my extended family in Oregon
Committee: Joint Committee On Transportation Reinvestment
Measure, Appointment or Topic: HB2025

I strongly oppose HB2025 as it is adding further financial stress on the taxpayers of this state. We are taxed to death on EVERYTHING in this state. We are on a fixed income as well as are many citizens/taxpayers in this state. I would not complain if the money that was raised in the past for numerous projects of "improvement" would have actually been made to improve our schools, our roads, and other critical infrastructure, but frankly I and others don't see those improvements. Where is our money going? Businesses are leaving this state as well as many long time residents. Stop the insane spending already! This bill needs to be terminated here and right now! This is not an income problem it's a spending problem and I, for one, am sick of all the increasing taxes and utility increases and seeing little to no change.
