

Submitter: Tami De Forest

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

Our children are either living at home still or struggling to make it on their already. These new taxes are only going to make it worse and has the means to push people over the edge. Young adults barely making it may give up on it all and our suicide rate could go up higher than it already is. This current Oregon administration is killing this beautiful state and helping increase the mental health issues of the people trying to survive.
