Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

I am in support of this bill. The public transportation in this city is the reason I moved here so I could be independent without a car whenever I am able. Riding transit during rush hour shows how many individual cars are removed from the streets that would otherwise cause congestion for travel and pollution. I have many reasons to support this bill. I need it and so do many others. There are many people that can go to and from a job that they couldn't otherwise get to or afford to live near without public transit.
