

Submitter: John Livingston

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

Along with a strong focus on sustainability I encourage two areas: wildlife crossings. The one that will be built in southern Oregon on Interstate 5 and a second improvement under the Ashland ski area turnoff should be fully supported by the State of Oregon. The second area is electrification of public busses and school busses. It reduces air pollution significantly and makes the busses much cleaner to run. Please support these improvements to the bill.
