Committee:

Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

I oppose HB 2025. The Oregon Government needs to stop taxing and start staying in the budget they already receive. Where do they think the citizens of Oregon will get all these additional taxes that they are dreaming up. People are already struggling with the already high taxes, rules and regulations that Oregon Government has already put on the citizens of Oregon. People don't have a never ending pot of money that the government wants. We have to live with a budget the government needs to. All these taxes they want should be voted on by the people. No new taxes , rules or regulations are needed. Government has gotten to big and to much overreach. Really sad that the government is doing this when most people are working and struggling to survive most aren't even aware of this bill the government is trying to pass behind their backs, last minute.
