

Submitter:

Donald Richardson

On Behalf Of:

Committee:

Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

I oppose HB 2025. We can not afford any more taxes, rules or regulations on the already struggling people iof Oregon. Retirees are already stretched on their budget. Where do you think the people are going to get all this extra money the government wants? The government needs to function in the budget they already receive. The Government is not being held accountable for their spending and failures with the money they already receive. We have to much government, to many committees, to much overreach. The government needs to stop spending money they don't have in the budget. All new taxes, rules and regulations should all be voted on by the people of Oregon. All these taxes need to stop.
