

Hello my name is Katysa my transportation story is I have been without a car for over a year now so I mostly take the bus we have a good bus schedule but I dislike how they get to the. Bus stop early and they will wait 30 seconds and then leave it's not very beneficial to the ones that ride the bus I use it for doctor appointments or to get to other important events that I need to get to also it's an inconvenience at times when I get to the bus and it's not their and people say it has already gone before I even got to the. Bus stop they need to have the drivers punch in when they get to a stop so their not leaving early or leaving people that really need to get we're they are going thank you
