

I oppose HB 2025. HB 2025 will increase overall cost Oregonian families. Oregon Legislature and Governor are bankrupting the people and destroying Oregon as a State. This will be your legacy. We have said NO MORE TAXES.

This Act says that diesel will be taxed in the same way that gas is taxed now. This increases and adds taxes related to roads, cars, trucks and buses and says how revenue must be used. This Act would make the per-mile road usage charge mandatory for registered owners and lessees of vehicles over time beginning with electric vehicles on July 1, 2026. It would also let a person pay a yearly fee instead of the per-mile road usage charge. This Act tells the Division of Audits to do performance audits of ODOT.

This bill will cost Oregonians over \$1 billion per year. Oregon already has more transportation dollars to spend for transportation than most other states. Where's the money?

DMV has been doubling our fee from last year. Stop wasting our transportation dollars.
