

Submitter: Shane Watterson

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

I want climate change and pollution from combustion engines to be accounted for. It's time to switch to green energy alternatives whenever possible. We've waited too long already. Also, we need better public transportation. Cars have dominated our spaces for too long, we need better infrastructure for people using alternative transportation. Let's move more people, safer and cleaner.
