To whom it may concern; we are a small business in Roseburg and with everything that is going on we have a hard enough time keeping our business solvent and profitable so as to keep our employees employed. As a business owner, I myself do not take a paycheck some month's so as to make sure there is enough monies to make payroll and our bills and vendors are paid. Adding more fees and taxes to an already stressed economy is not the answer. My question is, why is ODOT in such a terrible state. It looks to me that maybe there needs to be some investigating into why they are not better managing the monies they are already getting just as a small business, such as myself and many others I know, have to. Instead of adding more fees and taxes why don't you find out how and where the money is being spent that is already being allocated to them and find out why they are not managing their budget better before we add more fees and taxes to the already stressed tax paying public. Thank you
