

Submitter: Zack Dahl

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

To Whom it May Concern;

A balanced budget approach with rational spending needs to happen before we raise more money through taxation. We can not afford to continue to spend at the rate the Oregon Government is. With little to no oversight of public monies, giving more money to a system that is broken doesn't seem logical.

Taxation of new modes of transportation also need to be considered as we move away from gas. What about electric vehicles, scoots, and bikes to name a few. All of these new electrical transportation vehicles, scooters and bikes ultimately our roadways.

I ask that you please get the "house in order" before you tax more people and give the broken system with no accountability more money. Accountability and oversight are key to a successful organization, we need more.

Sincerely

Zack Dahl
