

I'm writing you today to voice my displeasure and the continuing assault on The second amendment rights of Oregon residents

Senate Bill 243 must be defeated.

It appears to me that most of the representatives who are supporting these fanatical gun control bills have zero practical firearms knowledge.

These bills are coming from a place of emotion.

You are stripping legitimate lawful gun owners of the right to pursue recreation with firearms self-defense with firearms and having zero impact on criminality.

Legitimate sport shooters the type who own The types of firearms and accessories that you intend to ban in Oregon are among the least likely to commit crimes of violence.

The only criminals that will be impacted by this are the ones that you are creating by passing these unconstitutional laws restricting American second amendment rights.

That is correct... You will be creating criminals because people know that these laws are unconstitutional and they will not comply.

The real criminals, the ones that harm Oregon citizens will not be affected by this They will continue in their criminality and they will continue to harm organ citizens unabated.

And it is also become quite clear to half of the states registered voters that our Democratic representatives view gun owners and rural residents of the state of Oregon with contempt.

It appears that you view these citizens with such disdain that you have no problem shingling them out and violating their civil rights.

Those residents believe that you see them as the opposition and that you are running roughshod over them.

I'm here to tell you that a lot of Democrats own guns. They like guns and they use guns responsibly. You are pushing people out of the Democratic party with these ridiculous draconian laws.

Our democratic representatives need to wake up.

People are starting to begin to realize how the Democrats act when they achieve a supermajority. And people do not like what they see.

Our Democratic politicians and Democratic appointed judges gleefully upheld and seek to impose measure 114 upon the state of Oregon.

Measure 114 clearly violates both the second amendment and the Oregon State Constitution.

It appears that now elements of measure 114 are being inserted into Senate bill number 243.

Rifle such as AR-15s and standard capacity magazines that hold more than 10 rounds are in common use and they have been determined by the supreme Court to be protected as they are in common use for lawful purposes.

Permits to purchase a firearm clearly violate the second amendment.

It's clear that you intend to deny half of the state their constitutional rights as long as you possible In hopes that the supreme Court will continue to kick the can down the road.

Now that the federal government is bringing civil rights investigations and advancing these to the high court your days are numbered

You are opening the state up to civil rights litigation. You have violated the civil rights of thousands of oregonians There will be a huge financial impact to the state.

If the Democratic super majority has any common sense it will scuttle Bill 243 and it will also nullify the unconstitutional measure 114.

We are watching you closely. Many of the actions taken by the Democratic supermajority are disturbing. You have recently engaged in a ridiculous gerrymandering scheme designed to strip rural residents of any real representation. We have witnessed a new attempt to restrict the ability of oregonians to use the initiative process...and an attempt to make us only use courts jurisdictions that are favorable to the Democratic supermajority IE Multnomah county to challenge government overreach

It's becoming clear that once the Democratic party achieves a super majority they begin to become tyrannical.

I truly hope that you are listening to the voters of Oregon we are not happy with what we are seeing. And like I said before many of us gun owners were raised as Democrats. And many of us are so upset with what we've been seeing from you we are leaving the party
