Measure, Appointment or Topic: HB2025

howdy!

please fund this bill to provide safety & accessibility to North Portland residents in case of an emergency! if we lose access to medical care, food or any other necessities during a natural disaster that consequence will be on you. North Portland is so underfunded! I feel like I'm reading about or writing a testimony of funding support every other week! first our pools, then our libraries, next our community center and finally our safety access routes! this is unacceptable & devastating to an incredible community. please fund St John's!

thank you,
emerson
