

Submitter: Megan Petrucelli

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

Clean air is important to me as a biker, walker and resident. I live in the Argay neighborhood where air quality is very poor. It is important to me that officials stand behind their commitment to reduce harmful emissions from vehicles and support the development of green infrastructure and the safety and transportation investments proposed in HB 2025 and to go even further by including funding for trails and electrification.
