

Submitter: Jane Bartosz

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

As a Salem resident and lifelong Oregonian prefers to walk or ride my bike whenever possible, I appreciate work on a new transportation bill. However, I feel more work needs to be done to keep pedestrians and bike riders safe on routes that do not make them travel further to get to their destinations With an elderly mother who cannot drive. I also see a need for clean, easy and affordable transit. if we want a stable and green Oregon, we need to support the ability to safely and easily move around without hurting the environment and without putting the cost of updates and changes onto those who are least likely to afford charges and fees.
