I am submitting this on behalf of a community member that would prefer to remain anonymous. Their testimony is as follows:

Dear Joint Committee on Transportation,

I live in Warm Springs, OR and I'd like to give some insight into our transportation issues and needs. I will say there have been some improvements. A huge issue we had was our highway having no crosswalks and thankfully we have one now, but it only goes so far to where it's not entirely safe for our people to walk to their destination safely. Our speed limit has changed as well but not always followed. The reason I bring this up is because we recently had an accident happen where 2 men were hit by a car due to the lack of a crosswalk. Within our community, transportation is a huge issue as not everyone is financially capable of having a car. We do have transit which will go to Madras and back, which is all set times and sometimes it's early to where it gets missed as well. Within our community our homeless population is large for a small city and they are always in need of transportation which I think is very important for them. The transit offers our people to be independent and get their needs in Madras such as hygiene items, groceries etc.
