

Submitter: Dianne Harrison

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

Oregon has one of the highest gas taxes in the nation when gas prices have gone down in more and more states.

Oregon can't take any more. Businesses are leaving because it costs way too much to run a business.

People need to have transportation to go to work each day and need lower gas taxes to do that.

The small towns don't have public transportation to get them to work!

Trust in Oregon, for me, is at an all time low! Our education is one of the lowest in the nation and you continue to raise taxes so families are constantly stressed which has an effect on their children and learning!

There is lots of waste and unknown expenditures in every department in Oregon. Whose pockets are you lining!

Sincerely,
Southern Oregon taxpayer
