Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

Enough is enough! Stop taxing the citizens of Oregon and then wasting the taxpayers money on programs that are completely ridiculous. It's time for accountability in government officials and citizens. How about some personal responsibility from everyone! Why do you need tax for public transportation while you're letting people work at home. I live where public transport is not available but still have to pay state wide transit tax every month while the roads I do need to drive on to make a living are falling apart. Not sure where the road taxes the company I work for pays are going? Bottom line the government of Oregon will never have enough tax dollars because government officials don't work on behalf of the citizens but on behalf of themselves. I hope some of you still work for the people.
