

Submitter: Nora Kroese

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

To Whom It May Concern:

How can you in any conscience even think of these taxes, measures, bills, etc. being reasonable or even affordable for a great many of the Oregon residents. This will drain any and all funds that the average person has. You will be taking their ability to pay any of their bills, housing, food etc. The HB 951 is great but these bills, measures, etc. will even negate any possibility of the health bill working. A great many of Oregon residents are struggling to make ends meet at this point. Is the goal to add to the homeless? Is the goal to force the residents to sell what they have so it can be taken over to more apartments so that everyone can live in a box with no freedom at all? Also, is this a race to beat

Washington and California states to see who can take the most from their residents the fastest. Also, to have these things automatically raising yearly.

Whatever happened to the voters voting for these things? What happened to the Reps. representing/caring for their constituents? Sit back and look at this...how can you honestly defend any part of these bill/measures/etc. Thank you, Nora Kroese
