Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

Living in Oregon for 32 years I have loved this beautiful state but I keep watching friends and family leave because of the state of the cities, then high cost and government not listening to everyday people. This bill will drive cost a to ALL Oregonians. Those on margin who are just trying to drive to work. Small business owners like my husband who puts roofs on houses - can't take public transport when he needs a ladder in a truck to get up on roofs to do estimates and see the status of roofs. His employees need trucks to bring equipment to job sites. We are already taxes at one of the HIGHEST LEVELS in the US. Please hear your people. We are struggling.

Best,

Rachel Hansen
