Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

I'm retired, living within my "budget." In these times of shrinking buying power and government excessive spending, shouldn't our government be holding departments accountable for fiscal responsibility. There has not been enough transparency to show the money trail. Just telling us there is not enough money, is not transparency. Increasing taxes and fees as described in this bill does nothing to "help" Oregonians. It will create a heavy burden on everyone but those in higher income brackets. Will the increase cost of living in Oregon cause people to move out of state? I strongly oppose this bill. As our elected officials, it's time to show fiscal restraint.
