Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

Although I support our infrastructure and understand that hard costs of construction materials and labor have increased, I simply cannot support this bill. In particular, I object to tolling because it disadvantages working people who can't set their own schedule. If you are required to be at work at a certain time, you will have no way to shift your travel times to avoid the higher tolls. It's a regressive extra tax that hits the middle class the hardest.
