

Submitter: John Livingston

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

I appreciate and strongly support the proposed funding for: Wildlife Crossings, Great Streets program, and Safe Routes to School program. These investments improve the safety of our roadways for both motorists and wildlife and boost quality of life for all Oregonians. I also support increased oversight and accountability for ODOT as there appears to be a lot of wasted energy on planning for projects when we know they just need to get done immediately and eliminate some of the years for planning road projects. I'd also like to see some changes so that this bill fully meets the needs of Central Oregon's communities by spreading funding based on populations per square mile. Please pass a strong transportation bill.
