Measure, Appointment or Topic: HB2025

Our Kei mini-truck, Toki, helped build a beautiful garden for bees, birds, and butterflies in our disused back yard--one that adds to the tree canopy instead of being a nursery for invasive blackberries. He hauled picnic benches for our friends' coffee shops. He was everyone's go-to for taking recycling and dump runs. He took us camping and hauled firewood. He did everything for everyone. All this with a mini-sized footprint on our streets, our wallet, and our planet. But that was before his registration was taken away last year and he had to be parked. My efforts with the the DMV and ODOT to reinstate him have been unsuccessful, but this bill could get him back to work. Please support it.
