Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

HB3390

I strongly oppose HB3390A. This bill allows the legislature too much power in crafting ballot titles and descriptions. Referendums should be crafted by the people. And currently the the SOS legal body that assists people in this is working well and this should continue. The legislature is representative of the people working on our behalf. There needs to be proper balance of power and this goes too far with meddling or slanting referendum language to potentially misrepresent referendums.
