Sarah Hammond

On Behalf Of:

Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

HB2977

I believe this is the bill we've been waiting on. One that will allow sustained funding for programs to improve our biodiversity at a small cost, mostly paid by out-of-state residents. I personally would be more than happy to pay an extra dollar or two every time I visit places in Oregon like the coast, knowing that the money will be a reinvestment in our natural beauty and help preserve our incredible state for years to come. We should all feel a responsibility to leave the environment in a better place for the next generation, and this is the best option we have and the closest we've for achieving those goals. Please do not waste this opportunity and pass HB2977.
