IN 2023, the Democratic Party rank-and-file approved the following top priority legislative action item and I quote:

"Enact legislation or constitutional amendment which places limitations on private or corporate wealth upon elections, supports small donations, places limits on campaign spending, supports public financing of elections and makes the electoral process more transparent including requiring full disclosure of contributions with close monitoring of the entire process."

By delaying implementation of a bill supported by both the people of Oregon and the Democratic party faithful towards campaign finance reform, the legislature, dominated by Democrats, is demonstrating their lack of authenticity and their frivolous attitude towards reform which is badly needed and obviously supported by a majority of Democrats and Oregonians.

Or maybe the voice of the people doesn't matter anymore?
