HB2977

Is this a government for the people or is this a government for the politicians? Are you for improvement in Ore-gone and returning it to Oregon or do you politicians just want to screw the public with more tax money that isn't needed to run a government. Yet, you want more money to stop fire without supporting the land by proper fire preventions'. Now a hotel tax that you think is "good" for what? Will it just line the pockets of you un-American politicians who not only defy the publics negative belief of this hotel tax and think you are just out to make Ore-gone truly gone!
