

Submitter: Robert Haberman

On Behalf Of:

Committee: Senate Committee On Rules

Measure, Appointment or Topic: HB2977

I urge passage of this bill. It will provide increased funding for projects that will result in giving our wildlife and habitats a greater chance to survive, maybe even to flourish. All our state resources are increasingly under threat and these critical things can't speak or fight for themselves. But we can. An animal is tied to its habitat, and without protecting habitats, we doom species; they are inseparable. For everything we hope to see or experience or preserve in the wild, for ourselves and our children, passing HB 2977 is critical.
