

Submitter: Dave Ganslein

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

Oregon is strangled by high taxes and onerous regulations. HB2025 is the epitome of this.

No accounting was ever offered for the last debacle that was HB2017. "The money is gone and we just need more." Few projects were started, less were finished. We will not enjoy permanent supermajority if we cannot show the voters some degree of fiscal responsibility. At the rate people and businesses are fleeing Oregon, the tax base is shrinking and fewer people will have to pay more for the utopian pork that comprises this bill. Given our party's history of opposition to any form of motor vehicle use, I have no reason to believe any of the proposed funding would ever be used for road maintenance.

STOP TAXING OREGONIANS TO DEATH.

NO ON HB2025
