

Submitter: Alan McFetridge

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

This measure is absurd and reckless. This measure would kill many disabled adults that drive. The gas prices are way to high as they are. Here in Enterprise Oregon. Gas has risen to \$4.19 a gallon. Where is the sense in the mark up except making gas companies richer. I have heard that the fuel tankers from Alaska that drop off fuel to Washington, Oregon and California. Return back to Alaska still 90 percent full. That is ridiculous. When they should be returning back empty. Not 90 percent full. We need better leadership of getting all the fuel to destinations. To drive down these high fuel prices.
