

Submitter: Leslie Turner

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

I oppose this measure because it is over reaching in that all the increases of fees and taxes related to transportation are not helpful to the residents. There have been several increases in transportation taxes and fees over the last 8 years. I have not seen appropriate use of those funds during that period of time. The department of transportation of Oregon needs to have an audit by the Oregon Audits division and the results need to be published and the recommendations followed. New taxes and fees will only bring about more people and businesses and people moving out of Oregon. Please oppose this bill fully.
