Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

Dear Legislation,

As a working educator and wife of a rancher, these taxes seem absolutely devastating. If the goal is to try and drive all new businesses and some current out of the state, this is on point. Oregon truly needs a pause and take a reflective look at all of the programs we currently have and how to make them more efficient without just raising taxes and throwing more money at a broken system. I have lived here my entire life - attended schools, universities, etc. and have never seen anything as dysfunctional as the times we are currently in. It is time to take a look at the root causes of the problems, not add more burden to the already hard working folks of the state.
