Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

I am writing in opposition of HB2025, a bill that will impose significant tax burden on everyday Oregonians and businesses. Especially those in the rural areas, which comprise most of the state geographically. While these taxes may raise money in the short term, eventually this bill will result in a loss of your taxpayer base because people will be forced to move to states that are more affordable. Draining the state won't save it. Learn to spend the money you already have more responsibly. Thank you for your attention to this matter.
