Enough with this crap! You elected fools don't give a crap about us business owners and low income families just trying to survive in this tax, tax, tax state! My question is, why is ODOT in such a terrible state. It looks to me that maybe there needs to be some investigating into why

they are not better managing the monies they are already getting just as a small business, such as myself and many others I know, have to. Instead of adding more fees and taxes why don't you find out how and where the money is being spent that is already being allocated to them and find out why they are not managing their budget better before we add more fees and taxes to the already stressed tax paying public. Thank you
