

Submitter: Deborah Stumpf

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

Members of the Joint Committee on Transportation Reinvestment,
We are in opposition of HB 2025. Please do not pass this bill. The taxes and increases are literally suffocating us as it is and to add another \$11.7 BILLION in new taxes would put the nail in the coffin. We have worked and paid our taxes for almost 50 years and to the elderly and those on fixed incomes it is devastating to think our government is so irresponsible as to do this to the people. We were told that the lottery would help schools and that never happened. Then we keep getting our registration fees increased and taxes increased with absolutely NO oversight! This is completely out of control. Money, money, money is all this government wants, with no respect to the income or say so of the people. We, the people are never asked or allowed to vote on these increases. Please bring accountability back and quit taxing the people. Thank you .
