Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

Inflation the last 4 years has been devastating for working families. We saw our buying power go down significantly (20+%) and wage growth did keep up. This bill will further erode the ability of many to make ends meet. On top of that, we have seen other transportation packages be squandered with the like of billion dollar accounting errors at ODOT and little or no improvement in our roads. Oregonians have to budget and spend within our means, I suggest our state government does the same.
