

Submitter: Alan McFetridge

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

This measure stinks all the way around. Time for better leadership on this matter

The working folks and the retired can't afford these issues that do nothing but line the political pockets that sponsor this measure. Here in Enterprise Oregon gas is \$4.19 a gallon diesel is \$4.39. enough is enough. Time for the tankers coming from Alaska need to empty their loads in Washington, Oregon and California. Not return 90 percent full when they go back to Alaska. That is absurd. Making us folks pay for the rich to become richer. Time for new leadership and move the government office to Pendleton. Portland is nothing more then a bunch of liberals. Where as the Eastern Oregon has very little say. That isn't right. I oppose this measure and all the other measures too.
