

Submitter: LaVay Jeffries

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

As a retired citizen relying on a limited income, this bill would hurt my family. Fuel prices are finally coming back down nationwide but this state which is already one of the highest cost of living in the US due to add on taxes, makes it more difficult for all of us trying to survive. This is the kind of thing making those of us who have worked all of our lives and have been careful in paying off our debts to be taxed out of house and home. We would love to be able to travel locally and to Dr. appointments and grocery stores etc, without going bankrupt.. We live in a smaller community which requires our own vehicle travel. If you care about your senior citizen constituents please vote no. You may be in our position one day. Thanks for your consideration.
